**Don't get caught
up in the system**

The government has taken away your graduate deferments. They've taken away your fatherhood deferments. Now Secretary of Defense Laird tells us that there is no end in sight to the Vietnamese War. Present troop levels in Vietnam are to be maintained if not increased. The defense manpower experts say that you, the college graduates, are going to help keep the troop levels up. Are you going to continue to cooperate with and perpetuate a system that not only disrupts the lives of you and your family, but also uses human beings as cannon fodder in an oppressive war? If not, see us.
