STRIKE

The Fresno Bee said yesterday that the strike at FSC had fizzled. This is not true. The strike is gaining support. It has the official backing of your elected representatives, the student government. We also consolidated a lot of support yesterday with our march on ROTC. We realize that there are many students on the campus who are willing to sacrifice their classes to become involved in a nation-wide student effort to end the Indochina war. For the first time, we have it in our power to end this war now! Join the strike!

The picket lines are very important. We must confront our fellow students with our ideas and ask them to join us. This is an effective way to reach the masses of students and get them involved. Join the picket line!

Picketeers meet every morning at 7:30 at the campus main entrance, Barton & Shaw. If you come later, someone at Barton & Shaw will tell you where you are needed.
